

Mr Philippe Rose has over 15 years of experience in the energy sector, as economist and commercial advisor. Since 2018, he has been helping build partnerships in the renewable power generation space for a large energy multinational, including solar photovoltaic, onshore wind, storage and hydrogen.

His current area of focus is developing market access strategies for China. Prior to working in renewables, Mr Rose worked in conventional oil and gas, including seven years in Iraq and Saudi Arabia as secondee in gas public private partnership (joint ventures). His earlier experience took him to Brunei, Nigeria, The Netherlands and the UK. Mr Rose's areas of interest is in managing political volatility in environments where private investors face ambiguity and value advocacy is of particular challenge.

He holds an MA in International Affairs from the Fletcher School and a licenciate in Business and Economics from the University of St Gallen.
